

Audio/Video solution

AV, IT, Security, LCS & Sat-Com

Reliable and innovative

Alewijnse, your partner in high-end AV, IT, Security, Lighting Control and Sat-Com solutions for safety, privacy and ultimate form of luxury & comfort on super yachts.

About AV

Alewijnse developed an AV over IP system which is based on central installed hardware. AV sources will be distributed via an ultra HD 4K@60Hz 4:4:4 virtual matrix switcher. This switcher consists of Gigabit Ethernet encoders and decoders to distribute the requested AV source to the specific areas.

Easy expansion of AV sources, flexible functionality, easy maintenance, concentrated HVAC and power management are some of the functional benefits.

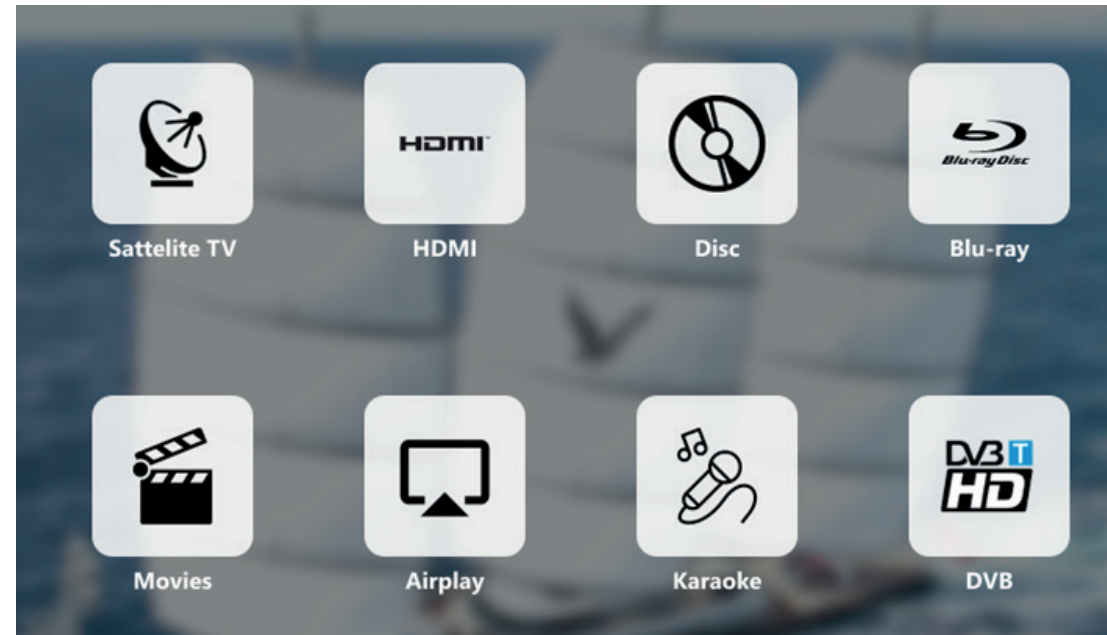

The system also offers the availability to use shared AV sources. An advanced priority system will assign the AV sources towards the prioritized areas. This innovative design will reduce the amount of hardware, weight, licenses/subscriptions, and maintenance. This translates into a financial benefit.

About Alewijnse

We are a leading system integrator of electrical and automation systems in the global maritime industry. Working in partnerships with our customers and suppliers, we offer a comprehensive range of technical solutions. These include electrical installations, power distribution, propulsion systems, vessel and process automation, audio, video & IT, Lighting & Lighting Control, safety & security and navigation & communications.

Delivering innovative, cost-effective and sustainable solutions with a high level of availability, we work on a great number of vessels, superyachts, naval & governmental vessels and dredging, offshore and transport every year in new build, refit and service.

Our employees work fast, are competent, flexible and resources are backed up more than 130 years of experience. To be able to serve you 24/7 around the globe we have a worldwide network of branches, representative offices and strategic alliances.

→ Client benefits

- Reliable
- State of the art system
- Future proof
- Intuitive and user friendly
- Easy expansion
- Reducing hardware
- Cost saving
- Easy maintenance
- Easy interfacing

WeDesign. WeEngineer. WeBuild. WeService.
