

Alewijnse Marine Systems

Statendam

Motor Passenger Ship

 **Alewijnse**

Statendam Motor Passenger Ship

The M.P.S. 'Statendam' is a very spacious ship that can carry 186 passengers. With four decks, the ship is one of the largest river cruise ships operating on the Dutch market at the moment. It is sailing on rivers in The Netherlands, Germany and Switzerland.

Alewijnse Marine Systems was asked by the owner to renovate the electrical installation. Alewijnse was selected, not only due to the fact of the long-term relationship with the owner, but also of in-depth knowledge of both nautical and electrical systems. The project was characterised by a great deal of onsite engineering and involved a lot of last minute changes and additions. The project included a change of the main supplies of the two generators for more power and redundancy. The river cruiser is now updated according to the latest developments.

This project was carried out by:
Alewijnse Marine B.V.
department Rotterdam
