

## About Alewijnse Marine

Alewijnse Marine is a leading system integrator of electrical and automation systems in the global maritime industry. We offer a full range of services, from the vessel design and construction phase to right through the operational life of the vessel. Delivering efficient and safe technical solutions with a high level of availability, Alewijnse Marine has an extensive track record in the Dredging, Offshore, Superyacht, Naval and Governmental markets. Our product range covers systems for all essential vessel functions, including energy & drive systems, vessel & process automation and navigation & communication.

## Yachts

Modern Super Yachts require highly sophisticated electrical, ICT, automation, entertainment and navigation systems to fulfill the dreams of their high demanding customers.

## System integration

Alewijnse Marine engineers are skilled in the systems integration that lies at the heart of fitting out these luxury craft. We understand that designing open and modular systems, that can be adapted over the course of a project, is vital given the rapid pace of development in electronics.

## Expertise

- Engineering & contracting
  - Conceptual and System design
  - Ship management & automation
  - Integrated bridge systems
  - Electrical & ICT solutions
  - Switchboard & console solutions
  - Power & energy distribution
- Propulsion & energy storage
  - Infotainment systems
  - IT networks and Cyber security
  - Navigation & communication equipment
  - Security and early perimeter warning
  - Service & maintenance (24/7)

## Energy-efficiency

Alewijnse is at the forefront of designing environmentally-friendly propulsion and energy-efficiency systems for yachts. We support our clients all over the world, delivering Dutch quality and attention to detail in both the established and newly-emerging centers of super yacht construction.
